CSIR NET Life Science Study + Quiz Planner

16 October - 10 December 2026

A topic-wise revision plan for the five book sections in your uploaded contents pages. Weekday study, next-day Telegram MCQs, Saturday PYQ and Sunday paid mock.

Milestone	Target
First coverage of all 65 listed chapters	26 November
Consolidation and mistake revision	27 November - 10 December
Scope	30 first-pass weekdays + 10 revision weekdays; 8 Saturdays and 8 Sundays
Book workload	529 estimated content pages, excluding answer annexures

Planning assumptions: Previously studied topics, around 4-5 focused hours on weekdays, starting 16 October. This is an initial plan because daily available hours and question counts are unknown. A fresh start or only 2-3 hours/day needs a lighter or longer plan.

Scope matters: This completes the supplied book contents: Biochemistry, Cell Biology, Developmental Biology, Genetics & Molecular Biology, and Immunology. It does not establish complete coverage of the entire exam syllabus. Match any other syllabus units with her existing preparation separately.

Exam date: 15 December is your planning assumption, not a verified examination date here. The official December 2026 application page was checked on 15 October; that page did not specify the Life Science examination date. Keep the 10 December target and check the official notice/admit card.

Official reference: NTA December 2026 application announcement

How to run each day

Weekday rhythm: 20 minutes closed-book recall; 60-90 minutes for yesterday's MCQs; 120-150 minutes for today's concepts and book coverage; 30-45 minutes checking mistakes. Shift actual times to her routine.

All book questions: Upload every question from the assigned printed page range, using the relevant answer annexure to verify the key. Question counts are not visible in the contents, so the page load is only a rough estimate. Keep chapter text, images and original question numbers together.

MCQ timing: Today's study is quizzed tomorrow, including Friday study on Saturday. Monday has no new Sunday-study quiz: use its quiz slot for old mistakes or backlog. On the very first day use a short baseline instead.

Saturday: First finish Friday's book quiz, then one full PYQ paper in the applicable official time limit. Review errors and guesses the same day. If the book quiz is large, split it before/after the PYQ and use Monday's catch-up slot; record the outstanding count.

Sunday: One paid mock in exam conditions, followed by analysis. Log the three biggest weaknesses and choose two for Monday. No new book topic is assigned on weekends.

Spaced retrieval: Revisit mistakes after 2 days and after 7 days for 10-15 minutes within the recall slot. An answer guessed correctly still enters the error log.

Overload rule: After the first two batches, use actual minutes per question to estimate the next day's load. If a quiz needs over 90 minutes, split into labelled batches, track every question, and use the next catch-up slot. Never mark a topic complete until all questions and explanations are checked.

Recovery: One missed weekday: use the next Monday catch-up slot or 27 November first. More than two missed weekdays, or a persistent quiz backlog, means the plan needs rebalancing; do not silently drop chapters or assume every question will fit.

Notes workflow: Send the topic pages before its study date. Notes should contain a concept map, key mechanisms, comparison tables, diagrams, experimental reasoning and common traps. These contents images alone are not sufficient to produce book-faithful notes.

Page convention: All page numbers are printed book pages, inferred from the next chapter start. Answer annexures: Biochemistry starts 154; Cell Biology 232; Developmental Biology 301; Genetics 425; Immunology 555. These annexures are for answer checking, not new study load.

Small-topic exception: A few days bundle 3-4 very short related chapters to leave genuine revision time. Organogenesis is split across two days; adjust its split at a natural subheading.

Week 1 | 12 Oct - 18 Oct 2026

Date	Study / main task	Telegram quiz / follow-through
Fri 16 Oct	**Biochemistry** Introduction to Biochemistry; Discoveries in Biochemistry **pp. 3-22 | 20 pages**	Baseline: short mixed recall check. Prepare tomorrow's first book quiz.
Sat 17 Oct	**Full PYQ test** Use a different available paper each week. Analyse wrong, guessed and skipped questions.	All book MCQs from pp. 3-22. Check key + log errors.
Sun 18 Oct	**Paid full mock** Analyse the result; select next week's two weakest areas.	No new book quiz. Carry forward Friday backlog only if any; protect mock analysis.

Daily check: [ ] concepts recalled [ ] all assigned MCQs attempted [ ] explanations checked [ ] errors logged

Week 2 | 19 Oct - 25 Oct 2026

Date	Study / main task	Telegram quiz / follow-through
Mon 19 Oct	**Biochemistry** Digestion; Bioenergetics; Biological Oxidation and Reduction **pp. 23-45 | 23 pages**	Catch-up: unfinished book MCQs first, then last week's wrong/guessed questions.
Tue 20 Oct	**Biochemistry** Enzymes and Coenzymes; Enzyme kinetics **pp. 46-68 | 23 pages**	All book MCQs from pp. 23-45. Check key + log errors.
Wed 21 Oct	**Biochemistry** Carbohydrate Metabolism; Lipid Metabolism **pp. 69-91 | 23 pages**	All book MCQs from pp. 46-68. Check key + log errors.
Thu 22 Oct	**Biochemistry** Amino Acid and Protein Metabolism; Nucleic Acid & Nucleotide Metabolism and the Urea Cycle; Porphyrin Metabolism **pp. 92-111 | 20 pages**	All book MCQs from pp. 69-91. Check key + log errors.
Fri 23 Oct	**Biochemistry** Citric Acid Cycle; Vitamins and Minerals **pp. 112-126 | 15 pages**	All book MCQs from pp. 92-111. Check key + log errors.
Sat 24 Oct	**Full PYQ test** Use a different available paper each week. Analyse wrong, guessed and skipped questions.	All book MCQs from pp. 112-126. Check key + log errors.
Sun 25 Oct	**Paid full mock** Analyse the result; select next week's two weakest areas.	No new book quiz. Carry forward Friday backlog only if any; protect mock analysis.

Daily check: [ ] concepts recalled [ ] all assigned MCQs attempted [ ] explanations checked [ ] errors logged

Week 3 | 26 Oct - 01 Nov 2026

Date	Study / main task	Telegram quiz / follow-through
Mon 26 Oct	**Biochemistry** Electron Transport & Oxidative Phosphorylation; Pentose Phosphate Pathway; Photosynthesis - Light and Dark Reactions **pp. 127-141 | 15 pages**	Catch-up: unfinished book MCQs first, then last week's wrong/guessed questions.
Tue 27 Oct	**Biochemistry** Signal Transduction; Biochemical Pathway Interconnections **pp. 142-153 | 12 pages**	All book MCQs from pp. 127-141. Check key + log errors.
Wed 28 Oct	**Cell Biology** Cellular Organization; Cell Divisions **pp. 164-190 | 27 pages**	All book MCQs from pp. 142-153. Check key + log errors.
Thu 29 Oct	**Cell Biology** Cell Cycle; Cell Organelles **pp. 191-207 | 17 pages**	All book MCQs from pp. 164-190. Check key + log errors.
Fri 30 Oct	**Cell Biology** Cytoskeleton **pp. 208-218 | 11 pages**	All book MCQs from pp. 191-207. Check key + log errors.
Sat 31 Oct	**Full PYQ test** Use a different available paper each week. Analyse wrong, guessed and skipped questions.	All book MCQs from pp. 208-218. Check key + log errors.
Sun 01 Nov	**Paid full mock** Analyse the result; select next week's two weakest areas.	No new book quiz. Carry forward Friday backlog only if any; protect mock analysis.

Daily check: [ ] concepts recalled [ ] all assigned MCQs attempted [ ] explanations checked [ ] errors logged

Week 4 | 02 Nov - 08 Nov 2026

Date	Study / main task	Telegram quiz / follow-through
Mon 02 Nov	**Cell Biology** Cell Signaling and Communication **pp. 219-231 | 13 pages**	Catch-up: unfinished book MCQs first, then last week's wrong/guessed questions.
Tue 03 Nov	**Developmental Biology** Gametes and Gametogenesis **pp. 236-255 | 20 pages**	All book MCQs from pp. 219-231. Check key + log errors.
Wed 04 Nov	**Developmental Biology** Fertilization and Zygote Formation; Early Development and Germ Layers **pp. 256-270 | 15 pages**	All book MCQs from pp. 236-255. Check key + log errors.
Thu 05 Nov	**Developmental Biology** Organogenesis - first half **pp. 271-283 | 13 pages**	All book MCQs from pp. 256-270. Check key + log errors.
Fri 06 Nov	**Developmental Biology** Organogenesis - second half; Sex Determination **pp. 284-300 | 17 pages**	All book MCQs from pp. 271-283. Check key + log errors.
Sat 07 Nov	**Full PYQ test** Use a different available paper each week. Analyse wrong, guessed and skipped questions.	All book MCQs from pp. 284-300. Check key + log errors.
Sun 08 Nov	**Paid full mock** Analyse the result; select next week's two weakest areas.	No new book quiz. Carry forward Friday backlog only if any; protect mock analysis.

Daily check: [ ] concepts recalled [ ] all assigned MCQs attempted [ ] explanations checked [ ] errors logged

Week 5 | 09 Nov - 15 Nov 2026

Date	Study / main task	Telegram quiz / follow-through
Mon 09 Nov	**Genetics & Molecular Biology** Discoveries in Genetics and Molecular Biology **pp. 304-324 | 21 pages**	Catch-up: unfinished book MCQs first, then last week's wrong/guessed questions.
Tue 10 Nov	**Genetics & Molecular Biology** Mendelian and Non-Mendelian Inheritances **pp. 325-336 | 12 pages**	All book MCQs from pp. 304-324. Check key + log errors.
Wed 11 Nov	**Genetics & Molecular Biology** Nucleic Acids; DNA Replication **pp. 337-362 | 26 pages**	All book MCQs from pp. 325-336. Check key + log errors.
Thu 12 Nov	**Genetics & Molecular Biology** RNA Transcription; Central Dogma - Genetic Code/Translation **pp. 363-380 | 18 pages**	All book MCQs from pp. 337-362. Check key + log errors.
Fri 13 Nov	**Genetics & Molecular Biology** DNA Condensation and Structural Organization; Prokaryotic Genetics **pp. 381-395 | 15 pages**	All book MCQs from pp. 363-380. Check key + log errors.
Sat 14 Nov	**Full PYQ test** Use a different available paper each week. Analyse wrong, guessed and skipped questions.	All book MCQs from pp. 381-395. Check key + log errors.
Sun 15 Nov	**Paid full mock** Analyse the result; select next week's two weakest areas.	No new book quiz. Carry forward Friday backlog only if any; protect mock analysis.

Daily check: [ ] concepts recalled [ ] all assigned MCQs attempted [ ] explanations checked [ ] errors logged

Week 6 | 16 Nov - 22 Nov 2026

Date	Study / main task	Telegram quiz / follow-through
Mon 16 Nov	**Genetics & Molecular Biology** Regulation of Gene Expression; Mutations and DNA Repair Mechanisms **pp. 396-411 | 16 pages**	Catch-up: unfinished book MCQs first, then last week's wrong/guessed questions.
Tue 17 Nov	**Genetics & Molecular Biology** rDNA and Genetic Engineering **pp. 412-424 | 13 pages**	All book MCQs from pp. 396-411. Check key + log errors.
Wed 18 Nov	**Immunology** Introduction; History; Innate Immune System; Adaptive Immune System **pp. 431-452 | 22 pages**	All book MCQs from pp. 412-424. Check key + log errors.
Thu 19 Nov	**Immunology** Antigens; Immunoglobulins; Antigen-Antibody Interactions; Humoral Immune Mechanisms **pp. 453-473 | 21 pages**	All book MCQs from pp. 431-452. Check key + log errors.
Fri 20 Nov	**Immunology** Cell Mediated Immune Mechanisms; Immunoglobulin Genes; Major Histocompatibility Complex; Antigen Processing and Presentation **pp. 474-488 | 15 pages**	All book MCQs from pp. 453-473. Check key + log errors.
Sat 21 Nov	**Full PYQ test** Use a different available paper each week. Analyse wrong, guessed and skipped questions.	All book MCQs from pp. 474-488. Check key + log errors.
Sun 22 Nov	**Paid full mock** Analyse the result; select next week's two weakest areas.	No new book quiz. Carry forward Friday backlog only if any; protect mock analysis.

Daily check: [ ] concepts recalled [ ] all assigned MCQs attempted [ ] explanations checked [ ] errors logged

Week 7 | 23 Nov - 29 Nov 2026

Date	Study / main task	Telegram quiz / follow-through
Mon 23 Nov	**Immunology** B Cell and T Cell Development; Cytokines; Complement System **pp. 489-503 | 15 pages**	Catch-up: unfinished book MCQs first, then last week's wrong/guessed questions.
Tue 24 Nov	**Immunology** Hypersensitive Reactions; Vaccines; Autoimmunity **pp. 504-520 | 17 pages**	All book MCQs from pp. 489-503. Check key + log errors.
Wed 25 Nov	**Immunology** Immunodeficiency; Hematopoiesis; Transplantation Immunology; Antibody Engineering **pp. 521-533 | 13 pages**	All book MCQs from pp. 504-520. Check key + log errors.
Thu 26 Nov	**Immunology** Experimental Immunology/Immunotechniques; Immunological Discoveries **pp. 534-554 | 21 pages**	All book MCQs from pp. 521-533. Check key + log errors.
Fri 27 Nov	**Revision / recall** Biochemistry recall: enzymes, energetics and central metabolic pathways	All book MCQs from pp. 534-554. Check key + log errors.
Sat 28 Nov	**Full PYQ test** Use a different available paper each week. Analyse wrong, guessed and skipped questions.	Re-test yesterday's weak concepts / flagged questions; check explanations.
Sun 29 Nov	**Paid full mock** Analyse the result; select next week's two weakest areas.	No new book quiz. Carry forward Friday backlog only if any; protect mock analysis.

Daily check: [ ] concepts recalled [ ] all assigned MCQs attempted [ ] explanations checked [ ] errors logged

Week 8 | 30 Nov - 06 Dec 2026

Date	Study / main task	Telegram quiz / follow-through
Mon 30 Nov	**Revision / recall** Biochemistry integration + Cell Biology recall: pathway links, organelles, cycle and signaling	Catch-up: unfinished book MCQs first, then last week's wrong/guessed questions.
Tue 01 Dec	**Revision / recall** Developmental Biology recall: gametes, fertilization, germ layers, organogenesis and sex determination	Re-test yesterday's weak concepts / flagged questions; check explanations.
Wed 02 Dec	**Revision / recall** Genetics recall: inheritance, nucleic acids, replication, transcription and translation	Re-test yesterday's weak concepts / flagged questions; check explanations.
Thu 03 Dec	**Revision / recall** Genetics recall: chromatin, gene regulation, repair and genetic engineering	Re-test yesterday's weak concepts / flagged questions; check explanations.
Fri 04 Dec	**Revision / recall** Immunology recall: innate/adaptive, antibodies, antigen presentation and lymphocyte development	Re-test yesterday's weak concepts / flagged questions; check explanations.
Sat 05 Dec	**Full PYQ test** Use a different available paper each week. Analyse wrong, guessed and skipped questions.	Re-test yesterday's weak concepts / flagged questions; check explanations.
Sun 06 Dec	**Paid full mock** Analyse the result; select next week's two weakest areas.	No new book quiz. Carry forward Friday backlog only if any; protect mock analysis.

Daily check: [ ] concepts recalled [ ] all assigned MCQs attempted [ ] explanations checked [ ] errors logged

Week 9 | 07 Dec - 13 Dec 2026

Date	Study / main task	Telegram quiz / follow-through
Mon 07 Dec	**Revision / recall** Immunology recall: complement, hypersensitivity, vaccines, clinical topics and methods	Catch-up: unfinished book MCQs first, then last week's wrong/guessed questions.
Tue 08 Dec	**Revision / recall** Mixed revision: weakest two topics from PYQs/mocks + recurring wrong questions	Re-test yesterday's weak concepts / flagged questions; check explanations.
Wed 09 Dec	**Revision / recall** All five parts: closed-book diagrams, comparison tables and experimental interpretation	Re-test yesterday's weak concepts / flagged questions; check explanations.
Thu 10 Dec	**Revision / recall** Final closure: due re-tests, remaining flagged questions and one-page summaries; no new chapter	Re-test yesterday's weak concepts / flagged questions; check explanations.

10 December closure: All 65 chapters covered, all assigned book MCQs accounted for, weak-topic re-tests checked. The 9 December quiz closes on 10 December; use 10 December for closure rather than adding a new batch.

11 December until the actual exam: Light recall, diagrams, formulas and existing error log. Keep sleep regular. Avoid new heavy material. Set the final taper dates after checking the official examination schedule.

Progress tracker & handover

Use this weekly record beside Telegram. Accuracy alone is not completion: keep total, attempted, wrong and remaining counts. These are manual tracking fields; this PDF does not change the bot.

Week ending	Book Qs total / done / left	PYQ score + weak areas	Mock score + weak areas
18 Oct	Total: ____ Done: ____ Left: ____	Score: ____ Weak: _____ _____	Score: ____ Weak: _____ _____
25 Oct	Total: ____ Done: ____ Left: ____	Score: ____ Weak: _____ _____	Score: ____ Weak: _____ _____
01 Nov	Total: ____ Done: ____ Left: ____	Score: ____ Weak: _____ _____	Score: ____ Weak: _____ _____
08 Nov	Total: ____ Done: ____ Left: ____	Score: ____ Weak: _____ _____	Score: ____ Weak: _____ _____
15 Nov	Total: ____ Done: ____ Left: ____	Score: ____ Weak: _____ _____	Score: ____ Weak: _____ _____
22 Nov	Total: ____ Done: ____ Left: ____	Score: ____ Weak: _____ _____	Score: ____ Weak: _____ _____
29 Nov	Total: ____ Done: ____ Left: ____	Score: ____ Weak: _____ _____	Score: ____ Weak: _____ _____
06 Dec	Total: ____ Done: ____ Left: ____	Score: ____ Weak: _____ _____	Score: ____ Weak: _____ _____

Topic completion: Read/recalled + every question attempted + key/explanation checked + wrong/guessed questions re-tested. Suggested planning signal: below 60% accuracy = priority repair; 60-79% = targeted practice; 80%+ = maintain with recall. These are study triage bands, not exam cut-offs.

Bot limitation: The current app loses history on a restart and shares answers between authorized users. Keep this manual record until persistence and separate learner tracking are implemented.
